

# Pre-course: JavaScript

## JavaScript – Ex12 – Capitalize Vowels

---

The following exercise contains the following subjects:

- ◆ JavaScript
- ◆ Loops
- ◆ Strings and String methods

### Instructions

Get a string from the user, capitalize every vowel (a, e, i, o, u,y) and print the result. Notice the existing case.

**Example:** “Hello dear Bootcamper” will print “HELLO dEAR BOOtcAmpEr”.

Submit the file to Hive.
