

# Pre-course: JavaScript

## JavaScript – Ex17 – Join two arrays

---

The following exercise contains the following subjects:

- ◆ JavaScript
- ◆ Loops
- ◆ Arrays

### Instructions

Write a function that takes two String arrays as parameters and returns an array that is the joining of those two arrays. Example: for the arrays: `arr1= ["Hello"]` and `arr2= ["AppleSeeds", "Bootcamp"]` we'll get `["Hello", "AppleSeeds", "Bootcamp"]`

Submit the file to Hive.
